Japanese Tile World

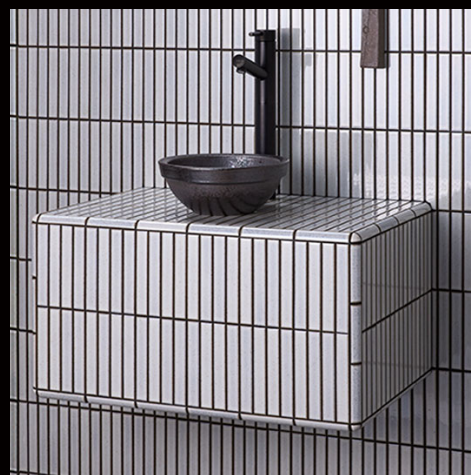

## The beauty of Japanese traditional glazes

"Biyusai" is a tile made using the techniques of Japanese traditional pottery glaze called "Yohen-yu." The tile is characterized by the random spots and various shades that occur by chance due to the flames in the kiln. In Japan, there is an aesthetic sense called "WABI-SABI" that loves nature and simplicity. Biyusai was born from such Japanese aesthetics.

## Ideal for Bathrooms and Kitchen Countertops! Trim Tiles for Versatile Use

Biyusai provides trim tiles that are perfect for neatly finishing corners not only in bathrooms but also for kitchen countertops. These tiles can be used to create tile counters, shower niches etc. Biyusai's trim tiles have the slim and small design. These are inconspicuous and won't spoil the design, so corners and edges can be completed with a stylish appearance.
